## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, 17-27 drawn to a method for fabrication of a concrete floor, and a system for the fabrication of a concrete floor, classified in class 52, subclass 742.13.
  - II. Claims 12-16, 28-32 drawn to a method for fabrication of a wall, and a system for the fabrication of a wall classified in class 52, subclass 745.09.
  - III. Claims 33-40, drawn to a method for fabrication of a building foundation, and a building foundation classified in class 52, subclass 745.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as walking surface, invention II has separate utility as vertical barrier, and invention III has separate utility as a supporting underlying load bearing structure. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I or II is not required for Group III, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mark Friedman on 2/7/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3637

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
